

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

JUNE 12.

ADJOURNED MEETING.

The President, SAMUEL G. DIXON, M.D., LL.D., Sc.D., in the Chair.

Eighteen members present.

The reception of papers under the following titles was reported by the Publication Committee:

"New species of North American bees of the genus *Andrena*," by Henry L. Viereck (May 23). Referred to the American Entomological Society, (Entomological Section of the Academy.)

"A new humming bird from the Santa Marta region of Colombia," by Witmer Stone (May 25).

"Marine mollusks of Hawaii, I-III," by Henry A. Pilsbry (May 26, June 11).

"Dermapterological notes" by Morgan Hebard (June 25).

The deaths of the following members were announced:

Robert J. Hess, M.D., June 20, 1909.

Henry A. Green, 1913.

Eugene I. Santee, M.D., June 16, 1915.

Frederick Gutekunst, April, 27, 1917.

William H. Newbold, May 25, 1917.

On Hagenius brevistylus.—DR. PHILIP P. CALVERT exhibited two larval exuviae of the large dragon fly, *Hagenius brevistylus*, from Darby Creek above Heyville, June 18, 1916, and a female imago of the same species from Crum Creek, near Castle Rock, June 23, 1916, both localities in Pennsylvania within nine miles from Philadelphia. He remarked that only one previous record (a larva, Fairmount Park, 1893, by the late C. Few Seiss, of this Academy) of this species within the Philadelphia area existed and called the attention of those present to the desirability of noting additional specimens in the present month. The peculiar shape of the larva was commented on.

Beltian Bodies on Acacia.—DR. CALVERT also exhibited specimens of a Bull's Horn Thorn (*Acacia costaricensis* Schenck) from Costa Rica, showing the paired thorns and the "Beltian bodies" at the tips of the pinnules, and specimens of ants (*Pseudomyrma nigrocincta*) from one of these thorns, all collected by himself. He stated the
